## 6. ACCIDENTAL RELEASE MEASURES

Spill/Leak: Safely stop source of spill. Restrict non-essential personnel from area. All

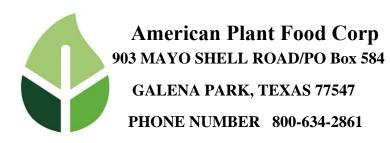

personnel involved in spill clean up should avoid skin and eye contact by

wearing appropriate personal protective equipment.

Cleanup: Sweep up spilled solid material, being careful not to create dust. Return

sweepings to stock or, if contaminated, place into a chemical waste container

for disposal according to local, state, and/or federal regulations.

## 7. HANDLING AND STORAGE

Store in cool, dry, well-ventilated area away from incompatible substances. Protect from physical damage. Avoid generating dust and the release of dust into the workplace. Refrain from eating, drinking, or smoking in work areas.

## 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

## **Applicable Exposure Limits:**

OSHA: Occupational Safety and Health Administration

## **Personal Protective Equipment (PPE)**

• Protective The hazard potential of this material is low. Where there is large-scale use of this material and significant potential for worker contact, gloves and long sleeved work clothes or disposable

coveralls may be necessary. Eye protection should be worn where dust is generated and there is

a potential that eye contact may occur.

• Ventilation: Use adequate local or general ventilation where necessary to maintain the concentrations of dust

well below the recommended occupational exposure limits for general particulates. Not

Otherwise Specified (NOS).

• Respirators: Where dust is generated and cannot be controlled to within acceptable levels by engineering

means, use appropriate NIOSH-approved respiratory protection equipment a 42CFR84 Class N,

R or P-95 particulate filter cartridge.
